EXPERIENCE

Research Assistant and Part-time Teacher at University of Jyväskylä

Nov 2025 - Present

- Developed multimodal AI pipeline for video and audio analysis as part of "The Rhythm of Life" research project.
- Managed Natural Language Processing course for Artificial Intelligence students, including project supervision and assessment.

Research Engineer at Huawei

Aug 2023 - Aug 2024

- Enhanced custom in-house distributed training library with PEFT, context expansion, and stabilization techniques, achieving 8x resource reduction.
- Conducted requirements analysis, and defined PoC roadmaps with cross-functional teams.
- Coded LLM architectures for compatibility with standard libraries, and significant inference speedup.
- Built scalable multi-backend inference platform with RESTful/streaming APIs, supporting scalable deployment and advanced sampling methods.
- Wrote multilingual synthetic data generation toolkit and fine-tuning pipelines for customer LLM adaptations.
- Ran ZeRO/FSDP/DeepSpeed multi-node training, tested models and supplied teams with improved data pipelines.

Undergraduate Research Fellow at Yildiz Technical University

Jun 2022 - Mar 2023

- Curriculum learning research in [publicly funded project](#), implementing difficulty-based training strategies.
- Developed data augmentation pipeline and experimented with auxiliary classifiers for early exit strategies.
- Deployed distributed training systems using TensorFlow, PyTorch, and Horovod on lab computers.
- Trained CLIP-style multimodal models with contrastive learning.

Research Intern at New Mind AI

Jul 2021 - Oct 2021

- Researched SOTA NLP techniques for a Document AI system assisting lawyers with Turkish legal documents.

EDUCATION

MSc. in Artificial Intelligence

Thesis Phase

University of Jyväskylä

BSc. in Computer Science

Jun 2023

Yildiz Technical University · 2nd in class, GPA: 3.84/4

PUBLICATIONS

Scaling Up Paraphrase Generation Datasets with MT and Semantic Similarity Filtering

2024

An extension of our prior work. Experimented with data augmentation using paraphrasing.

Semantic Similarity Based Filtering for Turkish Paraphrase Dataset Creation

Dec 2022

A method for creating paraphrase datasets from parallel corpora along the largest paraphrase datasets in Turkish.

Linguistic-based Data Augmentation Approach for Offensive Language Detection

2022

Augment classification datasets with a linguistic-based approach improving the detection of offensive language.

CERTIFICATES

Scratch to Scale: Large-Scale Training (Maven) <i>DDP, ZeRO, Pipeline & Tensor Parallelism, Multi-Dimensional Parallelism for LLM scaleups.</i>	Oct 2025
Deep Reinforcement Learning Course (HuggingFace) <i>Q-Learning, PPO.</i>	May 2024
Generative Adversarial Networks (GANs) Specialization (DeepLearning.AI) <i>GAN components, data augmentation, privacy.</i>	Jul 2023
Natural Language Processing Specialization (DeepLearning.AI) <i>NLP, Transformers, Attention models, Machine Translation.</i>	Jun 2023
Deep Learning Specialization (DeepLearning.AI) <i>Deep learning, including GANs and VAEs.</i>	Feb 2023
Machine Learning Specialization (DeepLearning.AI) <i>ML fundamentals and practical applications.</i>	Aug 2022
Introduction to Computational Thinking and Data Science (edX) <i>Introductory course in data science and ML.</i>	May 2021

Verification: All certificates are verifiable at [linkedin.com/in/mrbesher](https://www.linkedin.com/in/mrbesher).

VOLUNTEER EXPERIENCE

Volunteer Researcher at COSMOS AI Research Group Researching LLM/VLM performance using unlabeled data and RL; co-trained the strongest Turkish encoder based on ModernBERT architecture.	Dec 2024 - Present
Tutor at Schoolhouse.world Tutoring students worldwide in subjects such as Math, Computer Science, and more.	Feb 2021 - May 2021
Tutor at Aqsa Youth Institution Taught computer, networking, and programming basics to middle school and high school refugee students.	Nov 2020 - Aug 2021
Translator at Ask Me Assisted tourists visiting Istanbul as part of Fatih Municipality's "Voluntary Tourism Delegates" program.	Jun 2019 - Aug 2019

LANGUAGES

Arabic (Native) English (Advanced) Turkish (Advanced) Finnish (Beginner) French (Beginner)

SKILLS

ML/DL: PyTorch · TensorFlow · HuggingFace · OpenCV · NLP · TRAX · ZeRO · FSDP · DeepSpeed ·
Programming: Python · C · Rust · SQL · Java · Julia · **Tools:** Linux · Git/GitHub · ROS · Docker
